

**Institut für Med. Mikrobiologie, Hygiene und Infektiologie**  
**Hörsaal des Instituts für Med. Mikrobiologie,**  
**Domagkstr. 10**  
**16 h c.t.**  
**Institutskolloquium WiSe2024/2025**

- 10.10.2024**      **“Intracellular Staphylococcus aureus: virulence mechanisms and analytical tools”**  
Dr. Martin Fraunholz, Lehrstuhl für Mikrobiologie, Biozentrum, Universität Würzburg
- 14.11.2024**      **“Obesity and aging - Two critical factors in respiratory virus infections”**  
PD. Dr. Stefanie Deinhardt-Emmer, Institute of Medical Microbiology, Jena University Hospital
- 28.11.2024**      **“Immunological mechanisms in urinary tract infection”**  
Prof. Daniel Engel, Institute for Experimental Immunology and Imaging, University Hospital Essen
- 12.12.2024**      **“From fecal microbiota transfer to live biotherapeutic products - a state of affairs”**  
Dr. Maria Vehreschild Goethe-University Frankfurt
- 16.01.2025**      **“Staphylococcus aureus can adopt the Trojan horse strategy to escape antibiotics”**  
Dr. Françoise van Bambeke, UC Louvain Brussels, Belgium
- 23.01.2025**      **“Mirror images: the opposing regulatory effects of D-amino acids on virulence for different E. coli pathotypes”**  
Prof. Andrew Roe, School of Infection & Immunity, Glasgow, UK
